

# Boys and Girls Tuesday Group

Grace Hardwick, Eric Choi, Michelle Morency

- 3rd-4th graders at the Hennigan School
- Favorite Lesson Plans included:
  - Science of Color: Where different colors occur in nature, and a “rainbow in a cup” experiment using different amounts of sugar and food coloring in water to make a layered rainbow
  - Glo Germ Kits: A lotion that could be seen under UV light to replicate how germs stay on your hands without proper hand washing
  - The human body: Giant sketches of the human body and the digestive system, learning how systems work together (ex. Brain and heart involved in digestion)
- Teaching kids that STEM is the best!
