

United South End Settlements

"Club48" STEAM Program

At USES, we were fortunate enough to assist other teachers in running activities for kids of all ages as a part of their "Club 48" after school program. The Club 48 "STE(A)M" program seeks to expose kids to science, technology, engineering, and math through art. Throughout the semester, we were able to help the other teachers and volunteers, forge relationships with the kids, and eventually design and implement our very own lesson plan.

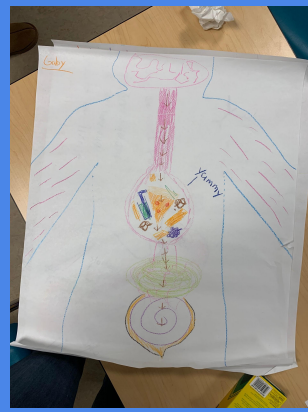

Teacher Aid

Lesson Planning

Our very own "Body Systems" activity
