

We talked to the kids about plants, the various plant parts, the functions of these parts, and the life cycle of plants.

Youth Tutoring Youth Labour Center

Today in Youth tutoring youth we made snow slime and talked about habitats and everything that is important for a habitat. We also talked about evolution and natural selection. Here's a picture!

The kids loved getting to setup and make their own bean plants, which were grown for the following few days and weeks. The goal was to illustrate to the kids the necessities a plant needs to grow as well as the life cycle plants undergo.
