

How to Communicate Effectively with Others?

As one of the **NU Global Island Project** service learners, I will share the experience of being a **student leader** in this service-learning. Also, I want to provide three tips to help people improve their communication skills.

3 Tips of Effective Communication:

1. Know your purpose

- ▶ When you start your assignments, you should know the purpose of it. It helps you have a clear understanding of missions so that you could work effectively.

2. Have a positive attitude

- ▶ Sometimes, you could face obstacles during your service time. If we never give up that hold an optimistic attitude, we can solve issues quickly.

3. Be a good listener

- ▶ When you listen to others carefully, you could catch their problems easily and directly. Then, you can provide the most helpful suggestions on their questions.
