Margarita Muniz Academy

Muniz Academy is dedicated to full cultural and linguistic fluency in Spanish and English for all our students. Through deep partnerships with our families and community, we prepare students for higher education, careers, and civic leadership.

Project Details

- As a project manager we were working with Cecilia, Director of Development at Muniz Academy.
- Developed the platform which will help our community partner for Fundraiser event in the Raffle.
- Designed the website for the Raffle fundraiser event. Also designed the flyers for the event.

Change of Plan

- The board of directors at Muniz Academy, came to conclusion that, the raffle event will not gather enough response due to the online environment and changed the fundraising event from raffle to cooking event.
- All the team members respected the decision of the Board and started brainstorming for the cooking event.

Cooking Event

- We will be managing the event with our partners from the scrap to make it a success.
- With this event, team intends to motivate all the participants, no matter the age or the gender, to explore the beauty and fun of the kitchen.
- So, get your apron and your appetite ready, because we are going to cook!

Team Muniz's Journey

- We enjoyed doing the project and working with the community partner, even though, Muniz scrapped the initial fundraising event when the project was completed.
- We still enjoyed working from scratch with the new project.
- It felt as though we did two SL projects in one and we are grateful for this opportunity.
- This project gave us an opportunity to learn and explore various aspects of managing a project.

A blue-tinted background image showing a business handshake in the center. In the foreground, there are office supplies like a laptop, papers, and a pen. In the background, a person is writing on a document. The overall scene is professional and collaborative.
