

# In The Footsteps of

By Zlata, Jessie, Skye and Ben  
Community Partner: Lisa Simmons from ROXFILM

A decorative border with a repeating geometric pattern of interlocking shapes surrounds the entire slide. At the top left, there is a horizontal line with a diamond-shaped arrowhead pointing to the right. At the top right, there are three small icons: a circle, a triangle, and a square, arranged horizontally.

# Value Hypothesis Statement

The augmented reality experience will consist of a *scavenger hunt of history*, where users will explore an area of Boston (Nubian Square/Roxbury) to gain knowledge about the Roxbury International Film Festival and how it created opportunities for filmmakers and stories of people of color throughout the past. It will give young people inside and outside of the community a chance to expand their knowledge on these topics in a fun and interactive manner.

# Project Vision

Through applying mobile AR technologies, we want to create and display the stories of underrepresented communities through the history of the Roxbury International Film Festival to raise knowledge in an interactive and active way.

# Overview and Synopsis

- The user embodies a character that is guided through the scavenger hunt around Boston, exploring the history of the Roxbury Film Festival and the journey of underrepresented communities. They will overcome the mystery of the hunt with the goal of learning as much as possible throughout the experience.
- There will be checkpoints throughout certain locations that will award the user with puzzle pieces as they encounter them. They will be guided through these locations by following a literal timeline that progresses through history.

# Intended Audience

Younger Boston residents and/or tourists who are interested in learning more about the Roxbury Film Festival.

# Relatability/Resonance

## **Relatability**

- Youth (students of Northeastern University and surrounding communities)
- Those unfamiliar with the International Roxbury Film Festival

## **Resonance**

*Theme:* Exploring the rich history of people of color and film

**Audience goals:** Learn about underrepresented communities and filmmaking through the history of ROXFILM and an entertaining scavenger hunt.

# Platform and Affordances

**Figma**

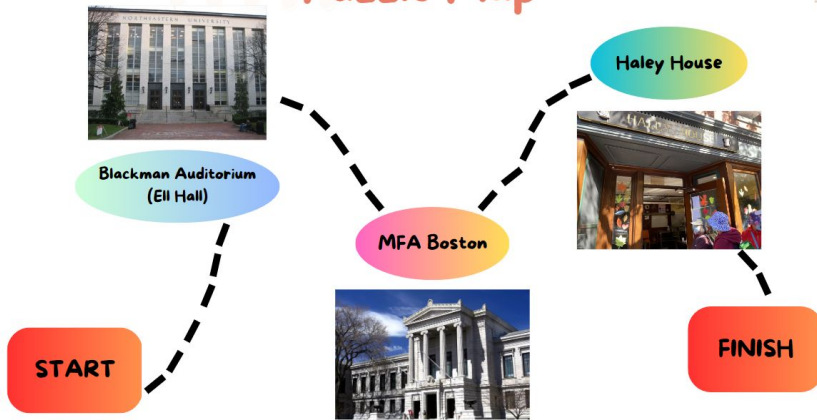

- static prototype, ideation

- asset creation

# Assets

## Puzzle Map

In The Footsteps  
OF "ROXFILM"

Explore  
Roxbury

From a new  
angle

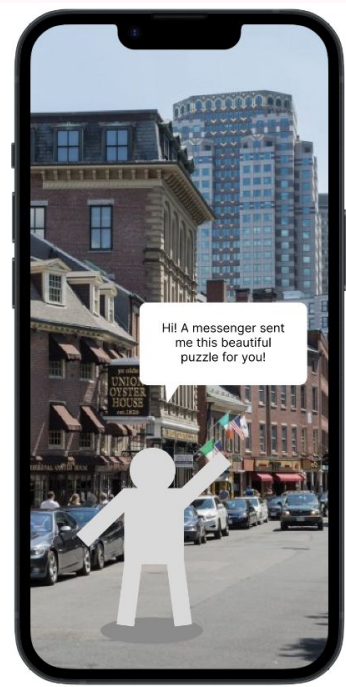

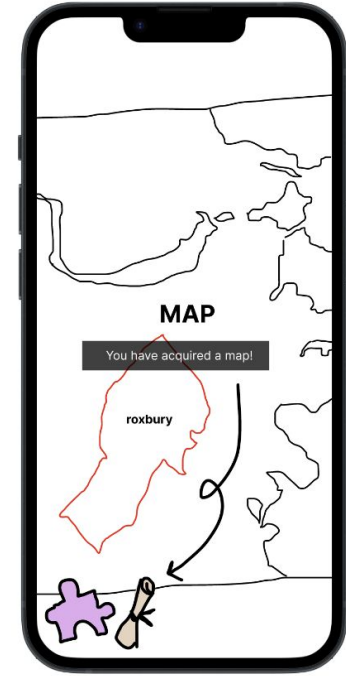

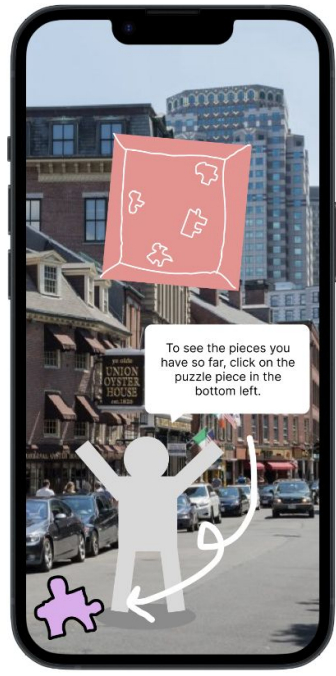

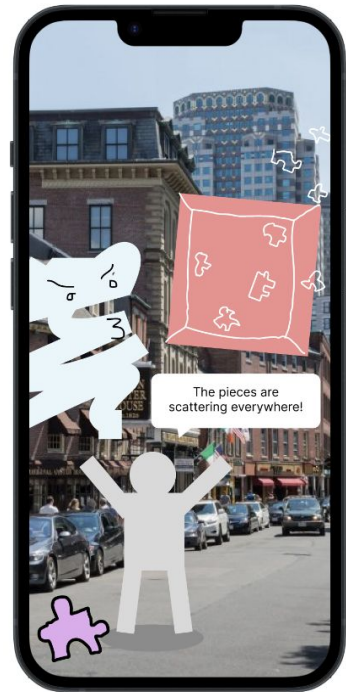

**ROX**  
**FILM**

# Figma → WireFrame of our narrative

## First Functional Prototype

- thinking about the **way of presenting information**  
(for user experience: didn't include a lot of clicking at the start point, easy to understand)
- only text
- only one space
- consider adding an **instruction page** before entering  
Hoverlay: the poster

## Changes to next Iteration

- after learning more about hoverlay → include more interactions
- adding the character (with 3 emotions)
- placing objects around in an easy-understood and interesting way!

# Final Demo Video

## Talking with Lisa

Northeastern was the original screening venue and screened films for about 10 years at those spaces.

Last step: Will display these precious memories and info on the board the users point to.

Try it out yourself!

**Thank you <3**
